

# ALL SEVEN 2021 GRADUATES GOT JOBS!

Congratulations and all the best as you embark on your careers...

SIMONE ABRAHAMSE

DALE MAREE

## WE CATCH UP WITH TWO 2021 GRADUATES

now teaching at Heathfield Primary; Simone Abrahamse, Grade 2, and Dale Maree, Grade 6

### What surprised you about teaching?

**SIMONE:** No matter how much you plan, something unexpected will always be thrown at you, whether it is a student question or a new challenge.

**DALE:** The amount of effort teachers put in after hours. Teachers spend afternoons and evenings setting up worksheets and tests.

### What did TP teach you about being professional and what can we learn?

**SIMONE:** How to communicate with colleagues, present myself professionally and keep my work and personal lives separate. Not doing so is exhausting.

**DALE:** Being on time is a game changer. This means arriving on time and meeting deadlines. It shows your manager you take your job seriously. It also shows your drive and effort.

**DID YOU KNOW:**  
**TEACHERS PLUS HAS TRAINED 16 TEACHERS**  
so far, all of whom are teaching and having a positive impact in our classrooms.

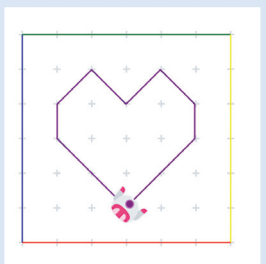

**LEARNING TO CODE**  
Sanele Nkomombini  
and Jamie Leigh Boyd

## With the introduction of coding and robotics into SA schools,

it is important our future primary school teachers feel confident to teach it. Using Code4Kids, our students have been learning Hyper Text Markup Language (HTML) and Cascading Style Sheets (CSS) for website building and JavaScript for Games and Robotics. Next students will practice teaching their new coding skills.

### KIPP THE ROBOT

shows geometry concepts can be incorporated into coding lessons.

### CAPS COUNT

Bottle tops from African Closures help our students and alumni to teach maths skills. Here learners discover factors of 36 by investigating different ways 36 bottle tops can be separated into equal groups.
